

# Molds and Accessories for Usage on Railway Properties

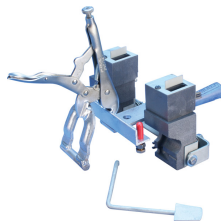

nVent ERICO continues to be the global leader in exothermically welded connections of power bond, signal bond, other power applications, and the grounding of railways and railway facilities.

## Grounding Applications for Railway Properties

These applications for railway properties utilize the nVent ERICO Cadweld Plus F80 and nVent ERICO Cadweld F80 welding materials.

## Power and Signal Connections to Rail

Introduced in 1939 to simplify the installation of rail bonds, continuous product development and innovation allows nVent ERICO to maintain a global leadership role in exothermically welded power and signal connections.

### WARNING

nVent products shall be installed and used only as indicated in nVent's product instruction sheets and training materials. Instruction sheets are available at [www.erico.com](http://www.erico.com) and from your nVent customer service representative. Improper installation, misuse, misapplication or other failure to completely follow nVent's instructions and warnings may cause product malfunction, property damage, serious bodily injury and death and/or void your warranty.
